

IN-DRIVEWAY TESLA TRAINING (In SWFL)

I pick up where dealer instruction leaves off.

PROPOSAL

Your Tesla is unlike any car you've owned before. I come to your home and work with you in your own Tesla, in your own driveway — at your pace, and focused on what you want and need to learn.

No technical mumbo-jumbo. No rushing. No expectation that you should already know. Just practical, one-on-one help that makes your Tesla easier to understand, use, and enjoy.

YOUR PERSONAL TRAINING CAN INCLUDE

Walk-Around

Cameras, sensors, charging port, trunk, frunk, doors, emergency releases, and more.

Touchscreen

Learn where things are, what they do, and how to find them again.

Charging & Range

Home charging, Supercharging, charge limits, range, and trip planning.

Tesla App

Everyday smartphone features you'll actually use. Including Summon.

Personalization

Driver profile, seat, mirrors, steering wheel, climate, phone key, and everyday settings.

Driving

One-pedal driving, regenerative braking, navigation, cameras, parking, and everyday operation.

FSD (Supervised)

How to activate it, use it, supervise it, and disengage when you want to take control.

CHOOSE YOUR PERSONAL TRAINING SESSION

60 Minutes

\$199

A focused, one-on-one session covering the Tesla features and questions most important to you.

RECOMMENDED

90 Minutes

\$249

More time for hands-on instruction, personalization, FSD (Supervised), practice and questions — without feeling rushed.

BOTH SESSIONS INCLUDE...

“Your New Tesla Made Simple” — Digital PDF Guide (\$19 Value)

Your personal copy of my 178-page Tesla guide gives you an easy reference for what we covered — plus many other features you'll discover as you become more familiar with your Tesla.

7 Days of FREE Q&A

Questions often come up after the training session. For seven days following your session, you can text or email me for answers to questions about your Tesla at no additional charge.

THIS IS YOUR SESSION

Introduction to many features are included but there's no canned presentation or rigid lesson plan. We'll concentrate on your Tesla, your questions, and the features you want to understand.

Personal, In-Driveway Tesla Training — Southwest Florida

Learn. Drive. Enjoy.

SERVICE AREA & EXTENDED SERVICE FEES

Travel is included for appointments within the TechTutorUSA local service area. For locations farther away, a simple flat Extended Service Area Fee applies. The fee is based on driving distance from the Alva area and is confirmed before booking.

DISTANCE	EXTENDED SERVICE FEE	EXAMPLE COMMUNITIES
0–30 miles	INCLUDED	Lehigh Acres, Fort Myers, Immokalee, Cape Coral, Estero
31–45 miles	+\$25	Fort Myers Beach, Punta Gorda, Bonita Springs, Port Charlotte, Sanibel, Bokeelia, Saint James City
46–60 miles	+\$50	Naples, Captiva; Boca Grande depending on exact location
61–80 miles	+\$75	Marco Island, Everglades City
Over 80 miles	By arrangement	Sarasota, Bradenton / Manatee County and other distant locations

WHY FLAT FEES?

A flat fee is easier to understand than a per-mile charge and recognizes that longer appointments require additional driving time. For example, a Naples visit can mean roughly 100 miles round trip and about two hours on the road before the training session begins.

LOCAL SERVICE AREA

Serving Fort Myers, Lehigh Acres, Cape Coral, Estero, Immokalee and surrounding Southwest Florida communities.

Borderline locations can be handled case by case once the exact service address is known.
